

Milestone Assignment

Upload Your Business Model

You have taken your first shot at drawing up your business model for your practice venture. Not only have you sketched your Lean Canvas, you have also presented it to your facilitator and classmates.

Obviously, you intend to run your practice venture based on the business model that you have drawn up.

If you want to make any changes to your business model, i.e. your Lean Canvas, based on the feedback that you received on your presentation, your chance to do it is now!

Once you make the updates that you want to, convert your business model to a PDF format and upload it to LearnWise.

Do not forget to write down your team name on your Lean Canvas!

Once you do so, your team crosses the second milestone of this journey!
